AUGUST 7, 1972

MR. ERNEST J. WESOLOWSKI
1416 PASADENA AVE.
OMAHA, NEBRASKA 68107

DEAR ERN,

THIS WILL CONFIRM YOUR RECEPTION REPORT OF TUESDAY AUGUST 1,
1972.

ONE ITEM ON YOUR REPORT HAS ME WONDERING...THE NOTATION OF ABC
NEWS AT 6:00. WE HAVE A NEWS IDENTIFIER THAT IS NEAR THE ABC
SIG, HOWEVER, WE NORMALLY DO NOT HAVE NEWS UNTIL 6:15. I DIDN'T
DO THE CHECK, BUT THE MORNING MAN WOULD HAVE NO OCCASSION TO
RUN A NEWS OPENING.

TO ANSWER YOUR QUESTION, YES, THE TEST SIGNAL WAS CONSIDERABLY
STRONGER THAN THE SIGN ON SIGNAL. THE TEST WAS RUN WITH 250 WATTS
AND THE SIGN ON, OR PRE SUNRISE SIGNAL IS A LUSTY 30 WATTS. ONLY
IN THE LAST COUPLE OF YEARS HAVE WE HAD ANY PRE SUNRISE BROADCAST
AUTHORITY, SO WE FEEL THAT ANY POWER IS BETTER THAN NONE. I'M
GLAD TO KNOW THAT YOU CAUGHT IT THERE.

CKLW IN ONTARIO GIVES US SOME PROBLEM BUT WHEN XELO CRANKS UP,
THEY GENERALLY SWALLOW US WHOLE.

THANKS AGAIN FOR YOUR REPORT.

KEN DUKE, MGR.,

KDDD, AM & FM
