Ernest J. Wesolowski
1416 Pasadena Avenue
Omaha, Nebraska 68107

Dear Sir:

I have your notice of Friday, March 31st, relative to hearing our signal on your set in Omaha. The items you listed on your log are essentially correct. During the evening hours, particularly after sundown, this station has to go directional and our strongest signal is beamed out in your direction.

Possibly skip distance was just right which contributed to your reception. I will enclose a coverage map for this station as per your request, which shows our .5 mm contour. You are slightly outside.

Thanks ever so much for writing to us and I hope we get to hear from you again sometime soon.

Sincerely,
BLACKSTONE BROADCASTING COMPANY

David Bothwell
