20 March 79

Dear Mr. Wesolowski:

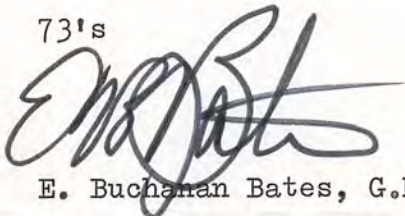

In response to your reception report 79-16-T, WREL did indeed run a frequency check on our 1kw Gates BC1G transmitter on the times specified in your report of Tuesday March 13, 1979.

Please consider this a confirmation of same.

Enclosed please find a coverage map of the WREL listening area. Afraid we're out of bumper stickers at this time.

Thanks for your interest.
