

RADIO

KODI

CODY, WYOMING

Mr. Ernest J. Wesolowski
1416 Pasadena Avenue
Omaha 7, Nebraska

Dear Sir:

This station conducts nightly frequency checks from 12:45 to 1:00 AM MST. Our operating frequency is 1400 Kc. Altho the tape you heard says our power is 250 watts we operate at one kilowatt.

Your report is substantially correct altho the announcer on the tape does not identify himself when signing off. I know, it's me.

Due to our recent power increase our coverage map is no longer accurate. Our studios are located in downtown Cody and our transmitter, an ITA AM1000-A, is operated by remote control.

Sincerely yours,

Ted Agnew
