WHEATLAND, WYOMING
October 16, 1963---

Mr. Ernest J. Wesolowski
1416 Pasadena Avenue
Omaha 7, Nebraska

Dear Ernest,

It is with the greatest of pleasure that I verify your report of reception of Radio Station KYCN here in Wheatland, Wyoming on the morning of Monday, October 14, 1963 from 12:11 MST until 12:19:15.

I regret that we do not have a coverage map, however I am keeping a record of all DX reports and should we get some made at a future date I will forward you one at that time.

We have our studios in the Globe hotel in Wheatland and our transmitter is located one-half mile Southeast of the city limits.

We employ a Collins 300G transmitter and operate it with Gates remote control equipment.

I greatly appreciate your DX report of KYCN. It is very interesting to know just where our signal wanders during these checks.

Yours very truly,
Nick Bonner
Chief Engineer
