Mr. Ernest J. Wesolowski
1416 Pasadena Av
Omaha, NB 68107

Dear Mr. Wesolowski,

This letter confirms your DX of Wednesday, June 3, 4:30 pm. We're happy that our signal is of sufficient strength in the Omaha area. We've received a couple of other reception reports from the Omaha area...reporting excellent RS and stereo separation...somewhat amazing when you consider our AAT is less than a hundred feet!

Your logging is correct for the period 1630-1645. Our transmitter is a CCA, model FM-20,000DM, feeding a CCA 6811-14 standing wave antenna radiating both horizontally and vertically. Our ERP is the maximum 100kwatts...at 107.3 Mhz.

If we can be of further service, please let us know.

Sincerely yours,

John Cutler
