Dear Mr. Wesolowski:

Thank you for dropping a line about our FM reception. Your report is correct. We operate with a power of 43,260 watts and are momo only.

On Saturday the 25th of August, it was very hot and humid and this improves FM reception considerably.

Enclosed is some information that may be of value to you.

Thank you for your time and trouble.

Sincerely,

RADIO STATION WJAG
Norfolk, Nebraska
