Dear Sir:

Thanks again for your nice report on our new transmitter  
1000 Watt 1320 Kcs which you received 3:10 to 3:30 am Feb 9th.

Our engineer came in today to start tuning up our directional  
array so we have hopes of being on the 1320 Frequency permanently  
within a few weeks.

Have a lot of DX letters to answer to much cut  
this short but thanks and lots of DX
