David F. Thomas  
Proctorville, Ohio

Dear David,

I am verry sorry that I have taken so long to reply to your very nice letter. Just after I received your letter, before I had a chance to reply, it was misplaced by some decorators who were redecorating the building for the hollidays. I have just found the letter so I am replying before anything else can happen to it. I really appreciate your sending a copy of DX news. It is really something. I would like to hear more from DX news. To whom should I write to get a subscription to DX News?

It's a shame I could not reply earlier because tonight is another night for testing. Our regular schedule for tests in the Fourth Wednesday Morning in each month From about 12:00 until 1:00 CST. If it is any intrest to you WGEA uses a Collins 20V 1000 Watt Transmitter with a 215' vertical steel Radiator which is series excited. We think that we get good results from it; however every report we get from someone like you helps in our apprasial of the overall operation. Thanks Again and hoping to hear from you soon.

\*73\*
