

W•NUZ

Radio Center

Talladega, Alabama

January 26, 1962

Mr. David F. Thomas
Protorville Ohio

Dear David:

Thanks for confirmation, I will confirm your letter,
and the fact that I did run a test on the morning of January
8th. Particulars on this station are as follows:

250 watts day and nighttime operation, from 5:am until
11:pm. Output (non directional)

The only confirmation of this broadcast was from
David L. Gleason, Cleveland Heights 18, Ohio. He
informed me the only interference I had was from
radio station WNUZ in Houston, Texas, which is also
an unlimited station with a radiated power of 50,000
watts on 1230 KC.
