

Verifying your reception of KOSE's
DX for the National Radio Club on
860 from 2:00 to 3:00 a.m. CST
December 20th, 1955.

OSCEOLA BROADCASTING CORPORATION

TELEPHONE 860 OSCEOLA, ARKANSAS
Stuttgart, Arkansas,
January 6th, 1956.

Mr. David F. Thomas
Longwave Listening Post
Radio W.U.M.S.
Proctorville, Ohio.

Dear Dave:

Thanks for the swell report and thank you note for our DX for the National Radio Club. Although you said you didn't need a verie, we feel that it's the least we can do since you were nice enough to go to the trouble to write the report. Checking the listings you submitted with our Master log for the program, we find that the report is correct.

This letter is to verify your reception of KOSE from 3:00 to 4:00 a.m. Eastern Standard Time on 860 kc/s.

Jimmy Maloch and I really enjoyed doing this DX Test, and we hope you enjoyed it. So far we've received 36 reports, including several S/9s from the East.

KOSE operates with a kilowatt daytime only on 860 kc/s using a non-directional antenna.

Thanks again. Best of DX to you.

Cordially,

Scooter Segraves
DX Co-ordinator.

Serving — AMERICA'S GREATEST AGRICULTURAL EMPIRE —

Hi Dave -

Glad to hear from
you. Sorry P&T
couldn't listen. DK
fair here, but too busy
to really work for any
thing spectacular. Series
total 555. Glad you got
KUTV (ASL in today).
How's this for fancy paper?
Use these to write logs
on so I hear the sta.
