3XY RADIO FLASHES & CONTINUITY

5.4.44.

To. David - F. Thomas,

Thanks for your QSL re our transmission of 29-2-44. Altho., no details forwarded for checking it appears to be XY ok., - as often receive overseas reports. Transmitter is series modulated & power approx 600w

I have not heard the c.w. on 1420K.C. but our channel seems clear locally.

Yours faithfully,

L. Shepherd
