Dear Mr. Thomas,

Well, your letter was certainly a surprise. Whether you heard 7AD or not is a matter of conjecture, but on the meagre details you have given I would say it was 7AD.

At the particular time (0900 - 0950 GMT) 21st. March, we were broadcasting a choral programme and by re-playing that particular transcription we find that a man did speak at approximately 0932 G.M.T.

Many thanks for your report which arrived right in the midst of an evaluation of our radiating system, which we are considering for replacement.

Yours faithfully,
