David F. Thomas  
Radio W.U.M.S.  
Proctorville, Ohio

Dear Sir:

We appreciate your letter of August 16, on our reception throughout central California. I must say Sequoia National Park is just about our most distant report. The nearest competition is one from Red Bluff, California on the north, from a regular listener.

From the south we have a few listeners in Fresno, California although this must be considered a fringe.

Our power in San Francisco is the highest with 82 K.W. developed by a General Electric 15 K.W. transmitter running at 10 K.W. fed into an eight bay Collins ring antenna.

On your next visit to San Francisco come in and see us.

Sincerely,

*Howard Bollenbach*
