Proctorville, Ohio

Dear Sir:

I am very glad to verify your reception of KVEC on Jan. 16th. KVEC was working on exactly 100 watts at the time you received us. Our equipment is RCA throughout, and we use an 218 foot steel tower.

KVEC is on the air once a month from 3:55 to 4:10 A.M. PST, in the morning of the second Monday of the month. At that time we work with a power of 250 watts, and I believe you should be able to pick us up.

Sincerely,

Earle Travis
Chief Engineer
