Mr. Thomas:

Thank you for your report.

During the morning of November 28, 1981, a crew of three engineers performed our annual proof-of-performance testing. You said that you could hear us, but weak.

That morning we did our testing until approx. 4:30 AM EST. So that signal you heard at 3:00 may have ours.

I don't know why you would not have heard our I.D. at 3:00. Anyway... Thank you for the letter, Sounds like you've picked-up quite a few stations in your years.

Our tests came out GREAT. We have Two Gates BCLG Transmitters at our plant. They still sound good after a few years.

Thank you again... Happy Holidays.
