Mr. David F. Thomas,
Proctorville, Ohio.

Dear Mr. Thomas:

Thank you very much for your report of our signal on August 21st while travelling in this area. We are pleased to receive such information, particularly since it apparently was compiled with care for accuracy.

Very few listeners these days take the trouble to let any station know how well it can be heard, whether at home or on the road, and we almost never get reports from out-of-state travellers passing through like yourself. It seems that radio has arrived and everyone takes it for granted.

If you are successful in picking us up in Proctorville we should like to be informed, but the chances are remote since we are daytime only on the 840 clear channel frequency. Still, stranger things than that have happened, and we never know what is next. Our 1000 watts does right well most of the time.

Again thank you and 73,

Lewis G. House
Lewis G. House,
Engineering Supervisor
