David f Thomas
Proctorville, Ohio

Dear Dave,

This is verification of the reception of this station on the morning of November 16, 1952 during our special test broadcast.

There was a bit of distortion during the broadcast due to two reasons. First there is a very definite ground loop present at the transmitting site where normally no program would originate. The single turntable and Microphone preamplifier definitely did not have any type of good bonding to ground. Secondly, I kept my percentage of modulation very high. Perhaps even overmodulating at times. The reason for this is obvious during a test of this sort.

Thanks once again for your very fine letter es 73's

Nick Yalowey W9OAA/W1

Nick Yalowey
Chief Engr. WNLK

PS No full report available as yet. Best DX so far--Dubuque, Iowa and Miami, Fla, also Lincoln, Nebraska.

I did get New Zealand and Australia once in 1948 from a 250 Watt florida station-WLBF
