ON YOUR DIAL

27 December 1954

Dear Mr. David F. Thomas,

Thanks for your mighty fine report of our DX Program of Dec. 6th. This is to VARIFY your report as correct.

Say, OM, your Long Wave Listening Post and Radio Station WUMS have my curiosity all worked up. Is it a police or Harbor Station?

I surely enjoyed doing the DX Program especially since we have received over 50 interesting DX letters. A special note from us is that I tape recorded the whole program two days before the test so that on that early morning (cold, snowy, and windy) all I had to do was to put the carrier on the air and let the tape go! Otherwise, you might have heard some "frogs" and my teeth chattering. Hi! Hope to sked another one of these days.

The National Radio Club promises to publish my summary report which I thought might be interesting to the DX Fraternity to see how others across the country got the program. There were a few interesting observations. One, a listener in Glendale, Ohio, reported fairly good reception on a "small clock radio with built-in antenna". Some of the boys with their super doopers in that same general vicinity didn't do as well! Hi.

Thanks for the tip that WSAZ was on testing during the program. Some of the listeners around New York said they thought the "other" carrier was WPAT testing either between half power and full, or between non-directional and directional antennas.

Best wishes for a Happy New Year.

Sincerely,

Charles V. Lundstedt
