S. MIGUEL — AÇORES

*Ponta Delgada,* December 18th 1934

Mr David Thomas  
Twenty Sixth Street  
Ferry County, Proctorville Ohio.

Dear Mr Thomas;

Many thanks for your letter dated November 9th  
It certainly seems that you have plenty of receivers on which  
to try for DX. We agree with you that it must be pretty difficult  
if not impossible to separate us out from all the other stations  
in the crowded 75 meter amateur band. You will observe that we  
are now operating on exactly 4000 KC. This new frequency takes us  
just outside the badly crowded amateur band and if there is no  
code interference from commercial stations you should now get us  
free of amateur CW interference at least when conditions are good

Thank you for your report

Yours faithfully

Station Director
