David F. Thomas
Pictorville, Ohio

Dear Mr. Thomas:

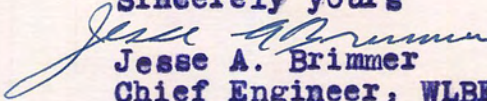

Your card received a short time ago, and am just now getting around to answering. Glad to have the information just the same.

I was suprized to hear that WLBE is so strong up that way. We have a twin tower directional system that sends our beam three ways, that is, east, west and north.

All other information enclosed on your card is correct.

We run thoses frequency tests each month on the secon d Tuesday.

Sincerely yours

Jesse A. Brimmer
Chief Engineer, WLBE
