Mr David F. Thomas
Proctorville, Ohio

Dear Sir:

Thank you very much for the interest shown in WMBM. We only run a kilowatt but all reports seem to indicate very excellent coverage. This is probably due to the location of our antenna and the fact that the ground system is tied into iron sheeting submerged in Biscayne Bay.

Our antenna is overall 264 feet high and is of the self supporting type manufactured by the Truscon Tower Company. The Transmitter is a Collins Type 20K. At the present time we are having the tower sandblasted and painted which is keeping me pretty busy.

If there is anything you would like to know about WMBM at anytime please feel free to call on me. Thanks again.

Very truly yours,

Eugene H. Wilbur
