NEW SMYRNA BEACH, FLORIDA  
26 April 1962

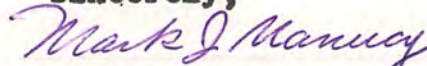

Dear Mr. Thomas,

It is with pleasure I confirm your report except that I wish CBE would be off the air once in a while. All the reports I have received from your area all mention CBE. Your location falls in a line with other reports which seem to indicate our first skip zone; so I was very happy to get your letter. I plan to do some testing between 1 and 4 AM(EST) Monday mornings to get a better idea of our coverage.

We have a quarter wave antenna 150' tall located on an island in the intracoastal waterway. Our studios and transmitter are in the Smyrna Yacht Club. Are using all Collins equipment including a 300G 250 watt transmitter. We went on the air 1 February 1962.

I was doing brief testing of a change I had made when you heard me.

Sincerely,

Mark H. Manucy, Chief Engineer.
