April 22, 1957

Dear Mr. Thomas,

I am very pleased to verify your reception report of April 15, 1957.

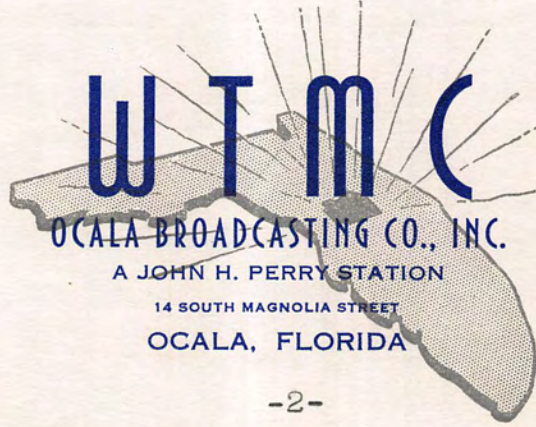

We have a 5000 watt RCA transmitter which is 18 months old.

We are very proud of it and its performance. We operate with 5000 watts daytime and 1000 watts directional night.

In answer to your questions, we installed our new RCA transmitter yast September a year ago. We did not get on the air full time until the middle of November. We lost two plate transformers and had to get an oversized transformer before we were able to stay on with 5000 watts. I asked that letters be mailed Monday because I terminated my job Friday, and I wanted get the letters verified before I left. There was an overflow of mail I am still answering them.

-2-

Yes 23 degrees is mighty cold for any time of year.

I don't know of any good jobs in Florida except in Cocoa, at
 the Air Force Base. I sure appreciate your letter.

Sincerely,

James H. Bailey, Jr.
