This is to acknowledge your request for verification of receipt of WACL's signal.

Our transmitter is a Collins 20V, rated at 1000 watts, the building for which is located approximately three miles north-east of Waycross on the banks of the beautiful Satilla river. We use a 404-foot guyed radiator.

At our studios, which are located on Memorial Drive in Waycross, we have Gates turntables and an RCA console.

We appreciate your interest, and we invite you to visit us when you are in this vicinity.

Very truly yours,

Lloyd E. McKinney

Chief Engineer

jtk

Your report was correct. This is your verification.
