Dear Sir:

Thank you for your letter of Feb 12, 1979. All told I have twelve letters to date concerning the DX test I ran between 1:30 and 2:05 AM. Most of the letters and calls I received were from the north and west-the farthest being from Madison, Wisconsin.

Concerning your comments, I keep reading rumors that stations like us that are now limited to daytime only may get to operate some at night. At least we hope so.

Again I am very happy to send this verification. If you ever hear us again please let us know.

Sincerely,

John G. Cunningham
