CLINTON, IOWA

March 2, 1942

Mr. David F. Thomas
Proctorville, Ohio

Dear Mr. Thomas:

Thank you very much for your DX reports on the reception of our signal. All DX reports are most welcome here at KROS. I was especially pleased to receive your report as I have just finished making some antenna adjustments.

This letter is to verify that your report and logging of our program on the morning of Friday, February 27, between 1:30 A.M. and 2:00 A.M., C.W.T. is correct. We were at that time conducting our regular monthly commercial frequency check program.

We conduct our regular commercial frequency check programs the last Friday morning of each month between 1:30 A.M. and 2:00 A.M., C.W.T.

Thank you again for your report and good DXing.

Very truly yours,

Gilbert J. Andrew
Chief Engineer.
