Lewiston, Idaho

March 28, 1958

Mr. David F. Thomas
Radio WUMS
Proctorville, Ohio

Dear David,

No, I doubt that KOZE is heard very often in Ohio. Between 1300kc and the topographical location of the Lewiston area (730 above sea level and 1500 ft below the surrounding country) we don't stand much of a chance on skips.

Many thanks for your DX letter, tho, and we were on the air Sunday evening and Monday morning (PST) (March 23-24) for a special test for the Newark News Radio Club.

Letters from Dxers and others have come in from the one night broadcast from thruout the country and Alaska and Canada.

Enclosed please find one of our KOZE-Newport gift lighters that we offered to all listeners, plus a brochure describing the Lewiston area.

We are happy to add your name and that of your location to our growing KOZE-land coverage map.

Best wishes,
RADIO STATION KOZE
