

WEEK

WEST CENTRAL BROADCASTING COMPANY

Commercial National Bank Building
● PEORIA 2, ILLINOIS

December 3, 1948

Dear DXer:

Many thanks for your interest in reporting our special program and test transmission on October 20.

It was a pleasure to put the program on the air to give you DXers a chance for verification. WEEK operates with a night time directional pattern that transmits most of our power north, south east, and south west which may account for some of the difficulty in receiving our signal.

This letter will confirm your reception of our station.
