

Station WKRO, Cairo,
Illinois.
July 12, 1942

Mr. David F. Thomas,
Proctorville,
Ohio.

Dear Sir;

This is to verify your report of our frequency check broadcast of March 21, 1942, from 2:00 to 2:30 CWT, on 1490 kilocycles. We appreciate your report and are sorry there was a delay in our reply. The private secretary of the "correspondence department of the Engineering division" seems to be on permanent leave, as is usual in a local station.

In reply to your inquiry to our test schedule, I rather think it will be discontinued of nights, and we will take a much nearer daytime service. 24 hr a day stations make this setup somewhat impractical.

Yours very truly,

Eugene E. Buller
Engineering department. W9NGU
