December 13, 1978

Mr. David F. Thomas
Radio W.U.M.S.
P.O.Box 11531
Tampa, Florida 33610 U.S.A.

Dear Sir:

You were correct in receiving our signal on December 11, 1978. We were conducting a frequency measurement test which is measured in Indiana at midnight.

Yes, your report is the first to be received from Florida. Makes you wonder who else can hear yours. Right?

We usually conduct our test on the second Sunday of the month at FM sign off which is 6PM, but do to interference problems, we had to do it at midnight.

The weather up here today is sunny and clear with temperatures in the 30's and 40's.

Have a Happy holiday and good luck!

Respectfully,

Mr. Frank E. Konwinski
Chief Engineer WSHY
