Dear David:

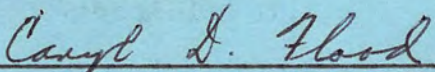

Thank you for your letter of April 4, 1973, reporting reception of our test signal that morning at 1:02 to 1:04. I can't imagine myself writing a nice long letter as you did on the morning of my wedding day!

I'm sorry to be so long in replying. We were then, and still are, in a renovation process, and so some things have had to go by the board. With summer daylight hours (we are a daytime station), and board responsibilities also, I just do not have time for all that needs doing. Very frustrating.

We are directional, mostly south-southwest. No, I had no other responses from that test, but yours is the most distant of any report ever. The reason for the brief test was that I had transferred the Sta-Level, Presence Equalizer, and the Peak Limiter to another rack in another part of the room, with all the attendant connections involved. It seemed to check out, but I thought to be sure, I would take to the air. It was OK.

Thanks again, David. And congratulations on your marriage; have a happy home!

Respectfully,

Caryl D. Flood, Chief Engineer
