Mr. David F. Thomas  
Longwave Listening Post  
Radio WUMS  
Proctorville, Ohio

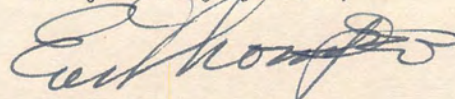

Dear Mr. Thomas:

I want to thank you for the report which I received from you. There is a QSL card included with this letter to confirm your report and needs.

I cannot understand the reason you could not pick up our FM signal, because at Rushville the signal ratio is still high. I checked the log and the program and our transmitter wasn't off any time through the afternoon.

I want to thank you also for taking time to tell me about the FM signal, so that I may know where to check to see how much signal we are putting into that territory. I imagine you were traveling route 52.

Very truly yours,

Earl Thompson  
Chief Engineer
