December 10, 1929

Mr. David F. Thomas
Proctorville, Ohio

Dear Mr. Thomas:

We have your letter of December 4 saying that you picked up a program from our station on your short wave adapter.

We were quite surprised at this as we are not broadcasting on any short wave but are broadcasting on our regular 1160 K.C. or 258.5 meters.

What you picked up must have been one of our lower harmonics and we wish that you would write us again and let us know if you are still able to pick us up regular or if it was just a freak occurrence that enabled you to pick us up that one night.

Yours very truly,

RADIO STATION WOWO
