

RADIO STATION

WSUA INC.

Bloomington, Indiana

September
Twenty-fourth
1 9 4 7

Mr. David F. Thomas
Proctorville, Ohio

My Dear Mr. Thomas:

I was certainly pleased to receive your reception report of WSUA on September 20. I appreciate these reports very much.

We do not use a regular verification card, as most people prefer us to answer by letter--our stationery is rather distinctive and we are rather proud of it, and we have had several compliments on it.

Your report is appreciated both from a technical standpoint and also for the fact that it is almost a letter from home. My home town is Ashland, Kentucky and Proctorville is well known to me. I formerly was chief engineer of WCMI--after a tour in the army I came to Bloomington to install WSUA's equipment and remain as chief engineer.

I stopped in at WSAZ this summer on vacation to see their 5kw layout. Is WHTN on the air yet? I almost took the job as their chief engineer to get back home again, but I am well satisfied here.

We have frequency checks once monthly--2:15am to 2:45am CST on the last Wednesday of each month. I usually get reports from these, but the daytime ones are more valuable. We are 1kw daytime only and have no other special schedules.

Many thanx, vy best 73's OM, CUL

L. J. (Jim) ROLFE, W9GYU, Chief Engineer
