Louisiana College
Monroe, La.

Feb. 4, 1950

Dear Sir,

We are pleased to verify your reception of this station on Jan. 22, 1950. We operate DA at night with our major lobe at 141° and our minor lobe at 321° .

You are the ninth person from that general section to send a report; that is unusual in that you are slap-dab in the middle of our "null" protecting WAVE. Have had a few reports from the west coast.

For the Chief Engineer,

Yours Truly,

B. C. Segrest
