Studio: WARE

Transmitter: COY'S HILL, WARREN

April 7, 1949

Mr. David F. Thomas
Proctorville
Ohio

Dear Mr. Thomas:

Thank you very much for your report of our equipment test broadcast on March 26, 1949.

Your reception report on an automobile receiver was especially interesting and I believe that it is the first such report received.

We have checked your report with our station log and find it to be correct; therefore, this will confirm your reception of WARE.

Transmitting facilities at WARE are located atop Coy's Hill in Warren, Massachusetts about midway between Worcester and Springfield. We were operating with a power output of 500 watts using a non-directional antenna.

Again, thank you for your interest and with best wishes for your DXing success.

Yours very truly,

RADIO STATION WARE
