Radio WUMS
Procterville,th Ohio

Dear Mr. Thomas:

While we received more distant reports on our DX program on Jan. 14th, none was as interesting as your own. I have never heard of anyone DXing on a car radio before,th let alone having had a report from anything like that distance on one before.

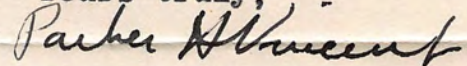

Both my transmitter engineers and myself are intrigued and curious about WUMS as described on the card enclosed.

If it would not be too much trouble,th wish you would enlighten us on that score. I never heard of anything but broadcast service on 1560 KC before.

I hope to arrange with the NRC and NNRC to conduct another test when WWSW is silent,th as I understand they are a couple of nights a month. We had good luck with this test, with reports from Canada,th Virginia,th and Ohio.

Thank you for your report.

Yours truly,th

Parker H. Vincent

Chief Engineer
