David F. Thomas  
Proctorville,  
Ohio

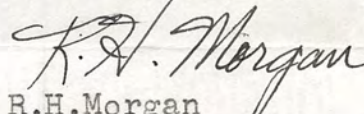

Dear Mr. Thomas:

Your fine report of the WBMD signal just arrived and we are very pleased to verify your reception of our station at 10:30 to 12:00 Noon EDST, August 23, 1949 from Hamburg to Harrisburg, Pennsylvania, on your car receiver as well as the later reports as you traveled southwest.

We are being careful to hold our modulation peaks to occasional values of 90% as the F.C.C. (at Laurel, Maryland) keeps a close check on overmodulation. As a result of this we are not quite as readable in the fringe areas as if we were "hitting it up" a bit higher like some of the boys are doing who are located in more remote locations.

Thanks again and best of luck.

Yours very truly,

R.H. Morgan  
Chief Engineer
