920 On The Radio Dial

LEXINGTON PARK, MD.

November 17, 1954

Mr. David F. Thomas  
Proctorville, Ohio

Dear Sir:

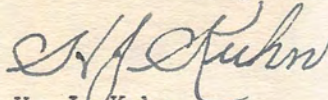

Many thanks for your report on our recent tests.

WPTX has been operating on 920 KCS. for almost a year now and will continue to operate at that frequency. At the present time we are installing a lot of new equipment in attempting to improve our signal and increase our coverage. The program you heard was one of many to be put on during the test hours.

WPTX is a daytime station which may account for the fact that you lost track of us. Our power is now 500 WATTS but we expect to go to 1 KW in the near future, of course, depending on the say so of FCC.

Sincerely,

PATUXENT RADIO, INC.

H. J. Kuhn  
Chief Engineer
