cars pass this board annually on Route 2 between Baltimore and Annapolis and on Route 50 near Easton facing traffic from Eastern Shore returning to Baltimore, Washington, and all points north and west.

Another reason why WYRE is the runaway leader in Chesapeake Bay Country!

Dave - Confirming your  
reception of WYRE on

26 Nov 1971 during special DX test. Other than  
the reports from you and Lemak, WYRE was  
never heard in Fla before. Nice to hear  
from you.

Dear DX'ers:

RE: November 26, 1971 Broadcast

Sorry about the delay in getting my verifications out to you. Holding down a full time job and a part time one(WYRE) plus going after a MSEE keeps me rather busy. I also procrastinate quite a bit, but I do not want to go into that.

The interference to our signal as reported from the group was from KCMO, KGO, WBAP, HJCY, Radio Sutatemala and PJB, Bonaire Netherlands Antilles. Radio Bogata also reported. Did not correlate call letters.

The most unusual report was from Carroll Utermahlen, W3HVD, of Baltimore, Md. Carroll was tuning his crystal set (he had it published in Radio Craft, Sept. 1946) and listening to CKLW beating against Trans World Radio, Netherlands Antilles. All at once he heard the CW Code ID and since he had no prior knowledge of our test he was shocked to hear CW on the BC band. He gave us a phone call and we had to do some explaining. The crystal set design of his looks interesting. Advise you to try to look it up in a library that has Radio Craft or write to Carroll at 3030 Fourth Ave., Baltimore, Md. 21234.

The rig here is an old (circa 1946) Collins 300G running 250 watts output to a 260 foot tower. Modulation enhanced by a modified CBS Audiomax and a Fairchild Dynalyzer.

Thanks and '73

Fred Matos K8GOV/3
