NK BROADCASTING STATION

1600 KC 1000 Watts
Summit and Getty Muskegon, Michigan

October 6, 1949

David F. Thomas
Proctorville, Ohio

Dear Sir,

Thank you for your DX report and interest
in our station.

This is to verify your log of our
station for October 19th.

We are especially pleased to receive
reports of reception at this time, because
we are setting up a new antenna system --- a
three element directional addition array.
We are phasing them for az. 0° for night
time duty, but we will still be non-
directional daytime.

We have all Gates equipment, operating
on 1600 Kcs., at 1000 watts. Our present
sign on is at 0545 daily and 0730 Sundays
to sunset, which is 1715 this month (all EST).

Thank you again.

Sincerely yours,
NK BROADCASTING CO.

G. L. Myers
