RADIOPHONE DEPARTMENT

July 31, 1925.

Mr. David F. Thomas,
26th Street Ferry Company,
Proctorville, Ohio.

Dear Sir:

In answer to your letter of July 25, I would like to state that you must have been misinformed regarding transmitters which we have. We have only our new 6-A 1,000-watt Western Electric transmitter at the present time. This transmitter takes the place of the 1-B 500-watt Western Electric outfit which we recently sold to the Moody Bible Institute of Chicago, Illinois. Preceding this we had a 1-A 500-watt Western Electric transmitter which was given to the Michigan Agricultural College.

We are very pleased to know that you have been able to receive our programs so well, and would like to hear from you from time to time as to how our signals are continuing to come through.

Yours truly,

THE DETROIT NEWS

Walter R. Hoffman.
