Dear Sir;

You asked for my coment and I will give it to you. I goofed...nuf said.

I made the schedule about a month ago and filled the infromation away and there it still is. My humble appology and I will write Newark News and try to set up a schedule and also try to fill my end.

Your report of your trip of last spring was very interesting. What kind of setup did you have on the FM Rx. Did you use an all direction Ant and how solid could you copy. I have been interested in the possibilty of FM reception in autos of standard FM signals.

Of course the report of 100 miles off our little teakettle here was very nice. If you had been about 2 weeks later you would have been lucky to get us past Columbia (25 miles) as our stick blew over on July 6 and I had a long wire ant on telephone poles. We had to operate that way for 10 days. We changed our Ant. from a non-guyed to a guyed tower and the new one seems to load up better and give a little better signal.

So if you get over this way this year please ~~stop~~ stop by and visit us.

Hope you had a very nice Christman and that the New Year will be the best,

Sincerely

Don Shepard
