The Seasons Greetings!

We at KIIYI are greatly pleased to have received 28 reports on our special DX program of December 2nd. Our delay in answering has been devoted to a study of how best we could repay your kindnesses, the while waiting for all letters to come in. Enclosed you will find a complete list of those from whom we received cards and letters. The stickers we promised are also enclosed.

The call letters, KIIYI, were chosen because the two syllables, KI-YI, vaguely resemble the yip and howl of coyotes, prairie animals native here, sometimes referred to as wild dogs. We pronounce it Ki-ote, Long 'i' and long 'o' with accent on the first syllable.

So that we may answer every question received we have mimeographed this too, in the hope the answers will be of general interest to you lads. We will name each of you and follow your name with "Confirmed" or "Sorry," and where we must use the latter, be very sure we ARE sorry.

Your expressions of gratitude in the name of NRC indicate how well you work together, and we note some of the boys "down under" also belong.

Russell Gaston, Hairini No. 1 RD, Te Awamutu, New Zealand, addressed our Lions Club in 1952 while here under the sponsorship of the International Farm Youth Exchange. We found him a very charming fellow who represented New Zealand very ably. His past is catching up with him. Ha!

This has been a very pleasant experience for us at KIIYI, and in closing may we again thank you sincerely? - and wish you every good thing in 1958.
