Mr. DAVID L. THOMAS
Longwave Listening Post
Radio W.U.M.S.
PROCTORVILLE, OHIO, U.S.A.

Dear Sir:

It was a great pleasure for us to read your letter dated on late June. We appreciate it very much. Your data & general comments, regarding our Radio Station, are for us of immense value. Again, thank you very much.

Your report of reception is correct and it fits in the same way to your broadcast characteristics.

We have just started our plans of improvement. Our Aerial System and transmitter will be located on plain terrain. (one side East the Toll Road between Cuernavaca and Iguala) This will help us a lot to accomplish your basic projects.

In deed, we have had a good number of reports sent to us by our tourist people driving either to Taxco or Acapulco. This make us very proud and happy.

Your request for data and general comments about our transmitter and terrain coverage, will be promptly satisfied as soon as our Chief Engineer have them ready for you.

The next time you come to this section of Mexico, please do not forget to honor us, we will personally shake hands and have a good chatter. We are very interested in your Longwave Listening Post at Proctorville. How does it function? Is it official or private?

We sure expect to hear soon and again from you, in the meantime, we wish to remain,

Yours Very Truly

Samuel Garrido Hayne C.A.
