

WMNC

Morganton, North Carolina

Affiliate of

April 23, 1955

Dear D Xer,

It is with pleasure I verify your DX report. Checking our logs, we find your report correct. WMNC was granted a CP last November to increase power from 250 watts to 5 kw, changing from 1490 kc to 1430 kc. Equipment tests on 5 kw were started on April 2, 1955, with regular program tests beginning on April 13, 1955.

Many thanks for your report.

Sincerely,

RADIO STATION WMNC
