Dear Mr. Thomas,

Thank you very much for the nice report on our signal in Proctorville. Your report was 100% correct and I'm hoping this letter will serve the same purpose as a ~~very~~ verification card. I've been hoping that we would get some nice cards printed especially to send to dx listeners, but so far no luck.

The transmitter here is a Gates 1000 watter ~~with a pair~~ with a pair of RCA 833 A's in the final. They are modulated by a pair of tubes of the same make. The antenna <sup>is</sup> ~~being~~ a Windcharger Quarter wave vertical and the studios, which are located in the center of town, contain mostly Gates equipment. All microphones are RCA Jr.'s.

Thanks again, Mr. Thomas, for the report and we are looking forward to hearing from you again.

Very truly yours,

*Jim Mayo*
