

Dear Dave,

Am happy to verify reception of WRRF on 12/14/43 from 3:30 to 4:00 E.S.T. for you. WRRF was operating on 930 KCS. using a power of 1000 watts using a Gates 1000-C Xmt. Your report is accurate. Thanks very much for reporting. It was certainly helpful in determining average night field strength.

Roy Phelps, Jr.
Junior Engineer
WRRF
