February 28, 1951

Mr David F. Thomas  
Proctorville, Ohio

Dear Dave,

Just a few lines to acknowledge your reception of Radio Station WVOT during our test program of Feb. 25, 1951. After checking our logs for that date I find your report to be correct and would like to add that we really appreciate your time and effort to write us.

WVOT operates on 1420 Kcs. with a power of 1000 watts day and 500 watts night dir. Ant. beaming East and West. We probably changed power when you could no longer hear us.

Once again let me take this opportunity to thank you for this report.

Very Truly Yours,  
*Dan Williams*
